

1 minute guide: Training

Safeguarding Training

In a setting, all DSL's **must** have a DSCP level 3 certificate which should be renewed every 3 years. All practitioners should have Safeguarding training as a minimum. In Doncaster, we state that best practice is to renew every 2 years (Refresher training).

See additional sheet for Level 3 safeguarding requirements.

Our core offer is to deliver:

Basic Awareness safeguarding training – this training is for new practitioners who have not attended safeguarding training in the past. This training is delivered in 2 parts, the first part is e-learning and should be completed before attending part 2 of the training which is delivered face to face.

This is delivered once per term for settings & childminders, the childminder training is aligned with the Childminder pre-registration safeguarding sessions.

Refresher training – this training is for childminders/assistants and practitioners who need to refresh their safeguarding knowledge/certificate.

This session is delivered every term. This can be increased or decreased depending on the demand. This training is delivered in 2 parts, the first part is e-learning and should be completed before attending part 2 of the training which is delivered face to face.

WRAP training – this training is delivered every term – this is currently a face-to-face virtual session. Once this is completed the delegates will receive a pre-recorded British value power point to complete.

Signs of Safety – this training is available to childminders/assistants and practitioners and is delivered face to face. This training is delivered every term.

Parental Conflict – this delivery is delivered every term over 2 sessions face to face.

LADO training – This training is offered to childminders/assistant and practitioners and outlines the referral and processes of LADO. This training is delivered every term over Ms Teams.

Child Protection and the pathway from Strategy discussion training – This training is offered to childminders/assistant and practitioners and goes through the pathway of a child protection case. This training is delivered face to face
