

Neurodevelopmental Assessment

RDaSH nurturing the
power in our
communities

What will happen?

We want to get to know all about you – what you're good at and what you find difficult.

Our team will spend time with you, with your parents/carers and with other people that know you well i.e. school.

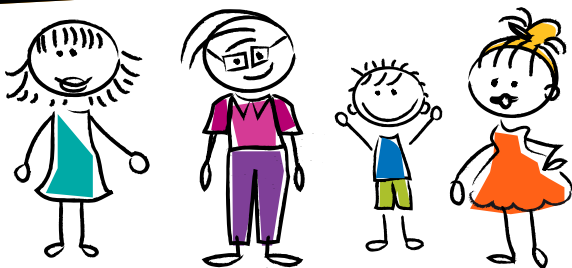

At the end you, your parents/carers and school will get a report with things you're good at and things you need help with. This will mean you can get some help with things you find difficult.

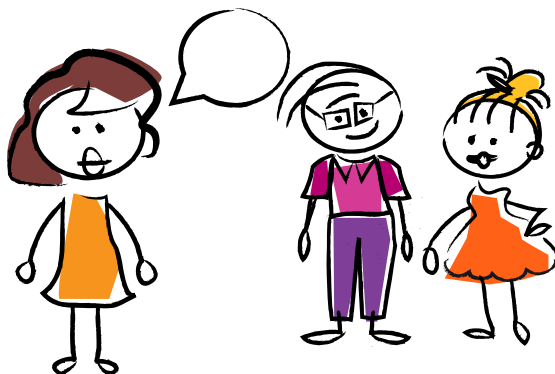

How it will happen?

You and your parents/
carers will meet someone
to have a chat.

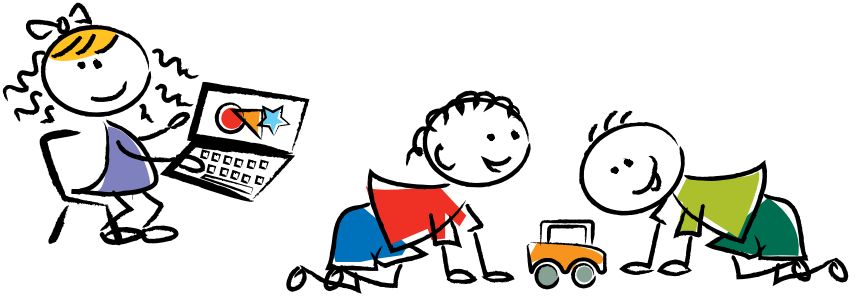

Your parents/carers will
come to see us to have
a chat about when you
were little.

We will come to school
and meet with your
teachers to learn
about you.

You will come to see us and you might play some games with someone or you might play on a computer.

Our team will meet and talk about everything that you have done with us.

You will come back to see us and we will talk to you and your parents/carers about what we have found.
